

Silver Colloid

The all Natural Germ Killer

Nature's Antibiotic

What us Silver Colloid?

A natural alternative antibiotic in the purest form available.

It helps prevent colds, flu's and all organism-caused diseases. Can also be applied topically

Silver Colloid is virtually tasteless – non-toxic, odourless and non-allergenic a pure natural substance consisting of sub-microscopic clusters of silver.

Silver Colloid may be taken indefinitely because the body does not build up an intolerance.

There are no known recordings of any allergic reaction to Silver Colloid, but if you do have a silver allergy it is best not to take the product.

Silver Colloid is safe for humans, animals, reptiles, fish, birds and plants. All multi-celled living matter.

Facts

How it works

The presents of Silver Colloid near a virus, fungus, bacterium or any single cell pathogen disables its oxygen metabolism enzyme, its chemical lung so to speak.

Within a few minutes the germ suffocates and dies, and then is cleared out of the body by the immune, lymphatic and elimination systems.

Silver Colloid leaves tissue-cell enzymes intact, as they are radically different from the enzymes of the single-celled life (virus, fungus, bacteria, etc.).

Thus Silver Colloid is safe for humans, reptiles, plants and all multi-celled living matter.

Silver Colloid is effective against 650 different illness causing micro-organisms (bacteria, virus, and fungi). It helps prevent cold, flu's and all organism-caused diseases.

It also does not interact or interfere with other medications. It doesn't upset the stomach and in fact is a digestive aid. It does not sting in the eyes, in case of burns, an accumulation of Silver Colloid can hasten the healing, and reducing the scar tissue and infection and topically it will remove pain and speed healing.

Here is a list of the many different and varied uses for Silver Colloid in everyday health and hygiene:

- ✚ Dab on cuts, grazes, rashes, sunburn and razor nicks
- ✚ Mix a little in your pets drinking water, birdbaths and cut flower vases
- ✚ Spray pet bedding and let dry
- ✚ Help reduce tooth decay, mouth sores and bad breathe. Silver Colloid is said to work by eliminating bacteria deep in the throat and on back of tongue.
- ✚ Add to human and or pet shampoos to gain disinfectant benefits

- ✚ Use on kitchen clothes and sponges to wipe down worktops and cutting boards
- ✚ Dan on acne
- ✚ Can be used as a deodorant
- ✚ Spray in shoes, between toes, on skin to give relief to skin itches, athlete's foot, fungi, etc.
- ✚ Add to bath water, gargle and nasal spray
- ✚ Aids recovery from colds, flu, pneumonia, respiratory infections and viruses
- ✚ Eye and ear infections, warts and some moles vanish (put on plaster and wear overnight until gone)
- ✚ Use with cotton balls on fingernails, toe nails and ear fungi
- ✚ Spray refrigerator, freezer and food storage bins
- ✚ Use routinely in laundry final rinse water and always before packing seasonal clothes
- ✚ Spray plant foliage to help prevent diseases like mould and rot
- ✚ Wipe telephone mouth pieces, pipe stems, headphones, hearing aids, eye glass frames, hairbands and combs
- ✚ Excellent for nipples and diaper rash
- ✚ Wipe around toilet seats, bowls, tile floors, sinks, door knobs
- ✚ Kills persistent odors
- ✚ Rinse invalids pillowcases, sheets, towels and bedclothes
- ✚ Eye infection - in case of pink eye or conjunctivitis, place one or two drops in the eye every couple hours
- ✚ Ear infection - use several drops or more in the ear every few hours
- ✚ Nasal infection - spray or use drops as needed in each nostril every few hours
- ✚ Mouth ulcers and gum infections - use one or two teaspoons inside mouth, swish from one side to the other for two minutes then swallow
- ✚ Colds and flu - use one or two teaspoons, place in mouth and absorb sublingually under the tongue. Repeat every few hours. Start early to help avert full-blown illness
- ✚ Sore throat and strep - gargle with one or two teaspoons for one minute, every two hours and swallow
- ✚ Cuts, scrapes, mild burns and abrasions- apply directly to area via a band aid or gauze. Change covering and reapply several times a day depending on the condition.

- ✚ Urinary tract infections – oral dosage one tablespoon taken three times daily, on an empty stomach. Most users find a noticeable improvement in 2-3 days, with the infection generally gone in 5-6 days
- ✚ Yeast infections – take a teaspoon every 3-4 hours for up to a month.
- ✚ Travelling take a teaspoon, absorb sublingually, every few hours
- ✚ Picnic foods – add one tablespoon per litre of picnic foods containing mayonnaise, dairy products or anything that has the potential of salmonella growth and poisoning. Stir well – leftovers and condiments – mix ¼ tsp into each container of mustard, ketchup, or pickle relish. Mix ½ tsp into items that spoil more easily like, mayonnaise, milk, etc. They will store longer and remain fresher and benefit digestion.

Topical Uses

Silver Colloid is painless on acne, burns, cuts, abrasions, in open wounds, in the nostrils for a stuffy nose and even in a body's eye because unlike antiseptics it does not destroy tissue cells.

Recommendations for skin problems:

- ✚ Acne – in addition to omitting sugars, fats and chocolate from the diet, any person with acne should wash and rinse face thoroughly four times a day; after each rinsing use a small amount of silver colloid and massage it onto the problem areas two or three times with a finger or a tiny piece of cotton. This wash-rinse-massage activity may continue through-out the acne breakout, or better, as a continuous prevention. This continuous habit precludes breakouts, leaving skin continuously clear.
- ✚ Cuts & Abrasions – apply Silver Colloid directly to the open wound and onto any dressing used. Silver Colloid may be used as the only medication on the dressing, or it may be used with other medications.
- ✚ Eczema & Skin Rash – dab Silver Colloid directly onto affected area, rubbing slightly. Repeat to keep area moist. Bandage lightly, if desired, keeping bandage moist with Silver Colloid. Change bandage daily
- ✚ Warts – cover wart with a small adhesive bandage saturated in Silver Colloid. Keep bandage moist. The wart should disappear in a few days. Large warts may take a few days longer

Other Uses

Acne, allergies, arthritis, blood parasites, burns, cholera, diabetes, gonorrhea, hay fever, athletes foot, herpes, leprosy, leukemia, lupus, lymphangitis, lyme disease, malaria, meningitis, parasitic infections both viral and fungal, pneumonia, blood parasites, rheumatism, ringworm, scarlet fever, septic conditions of the eyes, cancer, ears mouth and throat, shingles, skin cancer, staph infections, dandruff, syphilis, toxemia, tonsillitis, trench foot, all forms of viruses, warts, stomach ulcers, whooping cough, yeast infections, strep throat, eczema, blood poisoning, dermatitis,
